1. An Intensive Introduction to HydroRider Training – Charlene and Mary Lou (Starts in Theory Room with the Bikes) 4 CECs

We welcome land based 'spinning enthusiasts' to join water lovers and experience cycling in water, on a stainless steel bike. Land based spinning is as different from aqua cycling as aerobics is from aquafitness. This high quality bike is easy to maneuver into and out of the water, once you know the tricks of the trade. The HydroRider adds a brand new dimension to cross training, variety to pool programming and incredible leadership opportunities for land and water based instructors. Designed for athletes, recreational cyclists, pleasure riders and aquatic post rehab clients, the HydroRider has the potential to excite, motivate and meet the needs of all sorts of people. Get ready for: Familiarization and Orientation to cycling positions; Training Session Construction; Safety and Risk Management; Alignment and Core Activation; Communication and Motivation Techniques; Cadence and Intensity Manipulations and Post Rehab Considerations. Whether or not your facility has these bikes, come and have some fun pumping the pedals and satisfying your curiosity. It takes a bit of getting used to, but once you get it, you will love it! **Of Special Note:** Registrants in this workshop will receive a discount when completing the 20 hour CALA HydroRider Specialty Training and Certification Course.
